About me

Special points of interest:

- **I love all sports**
- **Experienced with all ages of children**
- **Helping children with homework**

Experience

1) Mountain Valley Daycare. June 06' to August 06'.

2) I have been babysitting for family friends since the age of 14.

I am a 19 year old student at North Texas. I am majoring in nursing, and hope to become a pediatric nurse working at Cooks Children's. I have a little brother who is 6 years old, and crazy as can be, so I know how to handle all ages of children. I love being around children because no matter what they can always make you smile.

Qualifications

I do not have any qualifications but I am willing to get first aid training if I need to do so. I have a good driving record and I am very safe with anyone in my car. In high school I used to help tutor kids with math and English, but math

I love how kids have such huge imaginations and come up with some of the craziest stories. I enjoy tutoring children and helping them learn about anything and everything. I love playing every sport for fun, although I may not be good at some sports, I still enjoy playing them with kids. I am very outgoing and I always want to make sure the

is defiantly my specialty class. When I worked at the daycare I worked in all age groups, from newborns all the way up to kids in the 2nd grade. I am not the type of babysitter who watches the child play, if the child

child is having fun. I am not the type of person to spank a child, instead I will give the child a few warnings and after that I will put them in time-out. After a few minutes of time-out I will go over and talk to them about what they did and explain to them why it is wrong. If any serious problems occur I will let the parents know.

wants me to join in their fun, then I will. If the child is happy, then I am happy.
